<b>Job Description</b>	

The Department of Land Resources and Environmental Sciences at Montana State University, Bozeman (<http://landresources.montana.edu>) is seeking applicants for a tenure track faculty position in quantitative watershed analysis (55% research, 35% teaching, 10% service).

The department will be hiring an enthusiastic individual who will embrace a multi-disciplinary approach to quantitative watershed hydrology and understanding the couplings among natural, agricultural, and human systems. Research responsibilities include developing a nationally competitive program in quantitative hydrologic analysis and environmental simulation modeling, complementing departmental

## Assistant/Associate Professor of Watershed Analysis Montana State University

strengths in soil science, aquatic and terrestrial landscape hydroecology, biogeochemistry, land-atmosphere interactions, restoration ecology, cropping systems, land reclamation, and spatial sciences. The position is responsible for teaching courses that emphasize quantitative analysis and geophysical simulation modeling at undergraduate and graduate levels. The successful candidate will participate in high-quality graduate and undergraduate programs, including undergraduate curricular advising, undergraduate research advising, and training of graduate students.

Applications can be submitted to <https://jobs.montana.edu/postings/18294>, where more details about the position are also available. Screening will begin 20 December 2019, and applications will be accepted until an adequate applicant pool has been established. Montana State University values diverse perspectives and is committed to continually supporting, promoting, and building an inclusive and culturally diverse campus environment.
