Job Description

The Department of Entomology at the University of Kentucky is seeking a broadly trained entomologist who will address the integrated management of arthropods (e.g., ticks and mosquitoes) that vector diseases affecting humans and animals. This combined research and extension position is located on the University of Kentucky Campus, Lexington, KY. Areas of applied research and extension emphasis could include development and implementation of integrated methods for surveillance, speciation, pathogen diagnosis and control of arthropod vectors of human and animal/livestock diseases. As part of a team of faculty members from Entomology, Animal Sciences and Veterinary science departments in College of Agriculture, Food and Environment and from Colleges of Medicine and Public Health, this individual is expected to develop a nationally and internally competitive research program and actively pursue external funding opportunities. This individual will develop and implement educational/outreach programs to support county-based extension personnel and other stakeholder groups, conduct problem-solving research to provide evidence-based vector management recommendations to stakeholders and cooperate in multi-disciplinary and/or inter-institutional teams. The incumbent is also expected to participate in mentoring of graduate students and the graduate education program in
