Special Qualifications

In keeping with the President's commitment to Tuskegee University becoming an "Outcomes-Oriented University," the ideal Research-Extension Instructor/Associate in Meat Science will possess the willingness to use their expertise to assist in the University's efforts to be a sustainable academic organization committed to excellence.

Essential Job Duties and Responsibilities

Conduct innovative research on the chemical and microbiological stability of meat and meat products. This research group has a special interest in beef, chevon, and associated product development. Prepare a detailed plan of operation for the TU Red Meat Processing Facility to include project activities and implement said plan accordingly.

Monitor and guide graduate and undergraduate students and project-related staff.

Collect and analyze research and extension data, and prepare manuscripts for journals and extension publications, such as fact sheets, research highlights, bulletins, and technotes.

Coordinate day-to-day research and extension activities of the facility: planning, implementation, monitoring, and evaluation.

Plan, advertise and organize training sessions, workshops, and field days.

Collect and compile daily accomplishments and prepare monthly, quarterly, and annual progress reports.

Perform quarterly, annual, and final impact assessments/evaluations of the project in a timely manner.

Prepare a comprehensive final report of the project.

Participate in relevant meetings, seminars, and conferences, and present the project results and outcomes as necessary.

Additional teaching opportunities are possible to compliments the faculty member's area of expertise.

Additional extension opportunities are possible to compliments the faculty member's area of expertise.

Ability to conduct impact assessments and prepare progress reports

Carry out other relevant activities as directed by the Dean, Associate Deans, and Department Head.

Qualifications

Graduated with a Ph.D. in the area of animal sciences, meat sciences, food sciences, or their equivalents.

Certification(s) in food safety training, including but not limited to 1) SPCA Preventative Controls for Animal and Hazard Analysis and Critical Control Points (HACCP)

A strong background in meat science and product development to include that associated with red meat animals, particularly goats and/or cattle
