research program on post-harvest poultry food safety to broadly address one of the following objectives:

1. Characterization of the microbiome of commercial poultry processing facilities to understand how bacterial populations in the processing plant affect the microbial population on processed poultry meat. Special emphasis will be placed on associations between *Salmonella* and *Campylobacter* in the processing environment microbiome and their contamination of meat processed in the facility.
2. Evaluation of the efficacy of antimicrobials to reduce the load of *Salmonella* and *Campylobacter* on broiler carcasses when applied individually and in combination during the broiler processing steps of reception, scalding, defeathering, evisceration, chilling, and/or deboning.

In addition, the successful candidate will mentor poultry science graduate and undergraduate students, engage in scholarship that results in peer-reviewed publications, and secure extramural funding to support their research program from sources such as USDA-NIFA, NSF, and other competitive programs, as well as from relevant industries in Alabama and across the country. The position **does not** involve a teaching appointment; however, successful candidates may develop and teach courses per their interest.

### Minimum Qualifications

Minimum qualifications are an earned Ph.D. from an accredited institution in poultry science, animal science, or closely related disciplines at the time employment begins. Candidates should demonstrate research experience in post-harvest food safety, microbiological and molecular biology techniques that are relevant to the positions. Ideal candidates should have documented evidence of their ability to conduct research and to work with faculty and students across multiple disciplines. The candidate must possess excellent interpersonal communication and organizational skills. The incumbent must meet eligibility requirements for work in the United States at the time the appointment is scheduled to begin and continue working legally for the term of employment.

### Desired Qualifications

Assistant Research Professor - Post-Harvest Poultry Food
