Job Description

The College of Forestry, Wildlife and Environment at Auburn University invites applications for an Assistant Professor position to expand our teaching and research strengths in quantitative ecology. Auburn University is a land-grant university and is the leading institution for research and education in wildlife, forestry, and natural resources in Alabama. The College of Forestry, Wildlife and Environment offers several undergraduate and graduate degrees in wildlife, and maintains strong collaborations with state and federal agencies, NGOs, and private entities in Alabama, nationally, and abroad. Auburn University is located in one of the most ecologically diverse states in the US and is surrounded by numerous cultural and historic features in nearby Montgomery, Birmingham, and Atlanta. These nearby cities offer an abundance of work and recreational opportunities. Information about the college may be found at **https://cfwe.auburn.edu/**.

This is a 9-month tenure-track position with a 50%/50% teaching/research appointment. Approximately 15% of the appointment for this position consists of providing statistical consultation for graduate

students and faculty in the wildlife program. The successful candidate for this position is expected to teach an undergraduate course in applied data analysis (WILD 5750) that is foundational to several majors in the College, and also contribute to undergraduate and graduate education within the wildlife program by teaching additional courses. The specifics of these additional courses would be based on the candidate's specialty area and the needs of the wildlife program, and would be developed in coordination with the Dean's office. The candidate will also be expected to establish an extramurally funded research program in their specialty area.

Auburn University (**www.auburn.edu**) is one of the nation's premier land, sea and space grant institutions with an enrollment of more than 30,000 graduate and undergraduate students. The University is nationally recognized for its commitment to academic excellence and community engagement, its positive work environment, flourishing student life programs, and beautiful campus. The University is located in the city of Auburn in east-central Alabama approximately 100 miles southwest of Atlanta, GA and southeast of Birmingham, AL and is about 60 miles from the state capital (Montgomery).
