About the opportunity

The University is seeking to appoint a Professor and Chair in Cereal Rust to lead a world-class research program focused on the management, genetics, and epidemiology of cereal rust diseases. This is a strategic role aimed at strengthening Australia's response to plant pathogens that threaten global food security, with a particular focus on rust diseases affecting wheat and other cereal crops. The research program has a 100-year history of excellence in research and training and the successful applicant will bring innovative ideas and skills to enhance our leadership and impact.

The position will be on the University's Camden Campus. This role follows a standard 40:40:20 workload model — that is, 40% research, 40% teaching (also referred to as 'education' or 'learning and teaching'), and 20% service and leadership. However, the University is open to considering a research-focused appointment during the initial phase, allowing the successful candidate to establish and accelerate their research program.

About you (skills, capabilities and experience)

The successful applicant will bring extensive international expertise in host-pathogen interactions, biosecurity, and disease risk management, with a focus on food security, environmental sustainability and resilience. The successful applicant will have a PhD in a relevant field, a track record of excellence in research publications and successful applications for research funding, in building successful teams (including successful supervision of Higher Degree by Research Students) and demonstrating clear leadership in the field. They will have a track record of success in teaching, research and publication commensurate with an international leader in the field of plant pathology and host/pathogen genetics. The successful applicant will have research interests that complement and/or enrich the existing strengths and expertise in the School of Life and Environmental Sciences (SOLES) including plant breeding, digital agriculture, molecular plant biology, and plant development science. They should have a strong track-record of successful collaboration nationally and internationally and articulate a vision for potential collaboration within SOLES, across the University of Sydney and beyond. They will have excellent written, oral and interpersonal communication and time management skills.

Sponsorship / work rights for Australia

Visa sponsorship and relocation assistance will be provided if required.

Term and remuneration

This is a continuing appointment on a full-time basis. The successful candidate will be offered a

competitive remuneration package commensurate with the responsibilities of the position and the candidate's relevant experience and qualifications.

Pre-employment checks

Your employment is conditional upon the completion of all role-required pre-employment or background checks in terms satisfactory to the University. Similarly, your ongoing employment is conditional upon the satisfactory maintenance of all relevant clearances and background check requirements. If you do not meet these conditions, the University may take any necessary step, including the termination of your employment.

To keep our community safe, please be aware of our [COVID safety precautions](#) which form our conditions of entry for all staff, students and visitors coming to campus.

EEO statement

At the University of Sydney, our shared values are [trust, accountability and excellence](#) and we strive to be a place where everyone can thrive. We are committed to creating a University community that thrives through diversity and reflects the wider community that we serve.
