methods and design tools like Auto CAD, SketchUP, Enscape, or Lumion for landscape strategies and sustainable horticulture in arid regions. This includes green infrastructure, environmental remediation, ecological resilience, urban ecology, and soil and water management technologies. The role is a permanent position involving teaching, research, and community service, with primary duties in undergraduate landscape design courses.

Minimum Qualification

The applicants should have Minimum Ph.D. in horticulture (ornamental/landscape design), or a closely related discipline from a distinguished international university and Post-doctoral experience. Proficiency in communication, leadership, and networking to facilitate effective collaboration. • Commitment to upholding elevated standards in teaching (in English) and student mentorship. • Proven dedication to fostering diversity and adeptness in interdisciplinary collaboration within the agricultural domain. • Demonstrated track record of published works in the realm of landscape design/ science. • Teaching experience in relevant areas • Good h-index according to Scopus ranking. • Demonstrated ability to attract internal and external grants.

Preferred Qualification

Responsibilities: The selected candidate will spearhead the establishment of an innovative research program focusing on both fundamental and applied dimensions in designing landscapes for different ecological situations, implementation and cost estimations. Should you be interested in this role and possess the necessary qualifications, we eagerly anticipate receiving your application. Your dedication to excellence and forward-thinking outlook will find a perfect home within our distinguished academic community.

Special Instructions to Applicant

To be considered for the position, please submit your Curriculum Vitae (CV), Cover Letter, research and teaching statement, qualification information
