Minimum Qualification

The candidate should have experience delivering undergraduate and graduate courses in the required field of expertise and related subjects. He/she should be able to supervise students research projects and theses. The candidate will play a key role in strengthening the department's teaching programs and advancing research addressing pest management, insect-plant interactions, biological control, pollinator health and the impact of insects on food security and sustainability in arid regions.

Preferred Qualification

Preference will be given to candidates with experience in integrated pest management (IPM), sustainable crop protection, insect taxonomy, environmentally friendly pest control strategies relevant to arid and semi-arid environments, plant pathology and the use of modern tools and technologies in applied entomology.

Expected Skills

The selected candidate will hold a permanent faculty position (teaching, research, and community service). Primary responsibilities will include teaching lecture and laboratory courses in entomology and pest management, advising undergraduate students and supervising graduate-level research.

Special Instructions to Applicant

The applicants must submit Curriculum Vitae (CV), cover letter, research statement, list of publications and teaching statement
